

The Best Day of the Week

A Research Article by a Very Highly Respected Researcher Named Donald

1 It is clear through all of my research that Friday is the best day of the week. This is true because it is the beginning of the weekend, for one thing. It is also sometimes a part of the weekend, depending on the week. For example, this Friday at Mandan Middle School, school is not in session, so every student could maybe sleep in. Sleep is invariably good for all people. Therefore, without question, Friday is the very best day of the week.
